

Furvise Vet Visit Brief

Prepared Sep 12, 2026 | Covers Apr 1, 2024 to Apr 30, 2024

Mochi | Cat

Breed: Calico domestic shorthair | Age: 8 years | Profile weight: 3.8 kg

Selected owner records, not a complete medical record.

Reason for visit

Compare Mochi's April 2024 body weight with the current profile weight at a routine visit.

Visit overview

Mochi weighed 3.97 kg on 2024-04-09 on the household scale without a carrier or harness, and the current profile weight is 3.8 kg. The April record says the reason for any change was not established, so the chart supports a comparison but not an explanation.

Supporting care history

Apr 9, 2024 | body measurement: Mochi weighed 3.97 kg on the household scale; no carrier or harness was included, and the reason for any change was not established.

Questions to discuss

- Is the difference between 3.97 kg in April 2024 and 3.8 kg now within normal scale variation, or is it worth rechecking under the same conditions?
- If you want to track weight more closely, how often would you want Mochi reweighed and under what conditions?

Not established in the available records

Current medication not saved
